

# JOSEPH MARTUCCI

Senior Software Developer

## PROFESSIONAL SUMMARY

I am a Senior Software Engineer with over 10 years of experience in building performant, responsive, and accessible user interfaces and APIs. My expertise spans a wide variety of domains including online chat, e-commerce, marketing, CMS-based sites, and internal tools with complex data views. While I specialize in front-end development using modern JavaScript frameworks like React and Vue, I also have experience in .NET, Java, Node, and PHP. I excel in cross-functional teams, collaborating seamlessly with product managers, designers, and fellow engineers.

## SKILLS & TECHNOLOGIES

HTML, CSS, TypeScript, React, Vue, NextJS.

CMS build outs in Storyblok, Contentful, WordPress, Craft, Drupal, and Sitecore,

Node, .NET, PHP, Java.

AWS, CI/CD tools including Jenkins, Teamcity, and Github.

MySQL, PostgreSQL, SQLite.

## Work Experience

### Senior Software Engineer

*Apr 2021 - Nov 2023*

#### CHEWY

Lead UI developer for the Connect with a Vet team, providing a web based interface for Chewy customers to engage in real time text or scheduled video chats with veterinarians. This includes work on all aspects of the Connect with a Vet experience: a chat widget for text chats, the main customer portal and intake flow, an interface for video chats, and an internal dashboard for veterinarians.

- Championed and architected a number of improvements to the developer experience across our projects, including migrating the team's front-end components and Next.JS applications to a Rush monorepo setup and setting up consistent Cypress component tests across all projects.
- Worked with the mobile app team to scope and build a Connect with a Vet experience in the native mobile apps.

### Principal Software Engineer

*Dec 2019 - Apr 2021*

#### RX SENSE

Worked across squads to improve and add features to both a white-label customer-facing prescription member portal, and an internal administrative configuration tool for our PBM (pharmacy benefit manager) software solution.

- Set up CI pipelines for both projects, and advocated for improvements in our code and agile processes.
- Mentored junior developers, and worked with a large offshore staff to improve code documentation and clarity.

### Lead Software Developer

*Jul 2016 - Dec 2019*

#### EDUCATION FIRST

Built single-page applications in React on .NET MVC backends to support internal sales users, and CMS-driven websites to help millions of travelers enroll and get information about their educational tours.

- Led the front-end chapter, bringing front-end developers across teams together to talk about challenges and tooling.
- Created an internal component library to share code, styling, and accessibility standards across teams.
- Mentored junior front-end developers on HTML/CSS/JS best practices and refined our interview and hiring practices to help grow the tech organization.

### Interface Developer

*May 2014 - Jul 2016*

#### PIXELMEDIA

Developed CMS-driven websites (WordPress, Drupal, Craft, and Sitecore) and React applications with rich user functionality for business such as 3S Artspace, Bauer Hockey, Bank of New Hampshire, and US Bank Canada.

## Education

BA in English from Boston College
